TOP ELECTRIC RANGE 2 PYROCERAM PLATES

PRODUCT DESCRIPTION

Stainless steel frame. Athermic thermostet plastic knobs with useful screen printed edges.

6 mm-thick pyroceram work top. Heating obtained through **30 x 30 cm radiant square plates with double circuit** placed under glass and controlled by a thermostat with 420°C maximum: when the radiant plate reaches the selected temperature, only one circuit keeps working, so to prevent the glass surface to cool down too quickly. Safety ensured by automatically-activated safety thermostat at 530°C inside the radiant plates.

AISI 304 2 mm-thick work surface with rounded edges for easy cleaning. Stainless steel AISI 304 front panel.

Laser-cut work top finishing for "head-to-head" matching and binding fastening.

Accessories available **on demand**.

TECHNICAL SPECIFICATIONS

Width: 400 mm
Depth: 900 mm
Height: 250 mm
Weight: 33 kg
Volume: 0.26 m³
Electrical power: 8.00 kW
