TOP ELECTRIC RANGE 4 PYROCERAM PLATES

## PRODUCT DESCRIPTION

Stainless steel frame. Athermic thermoset plastic knobs with useful screen printed edges.

**6 mm-thick pyroceram work top.** Heating obtained through **30 x 30 cm radiant square plates with double circuit** placed under glass and controlled by a thermostat with 420°C maximum: when the radiant plate reaches the selected temperature, only one circuit keeps working, so to prevent the glass surface to cool down too quickly. Safety ensured by automatically-activated safety thermostat at 530°C inside the radiant plates.

AISI 304 2 mm-thick work surface with rounded edges for easy cleaning. Stainless steel AISI 304 front panel.

Laser-cut work top finishing for "head-to-head" matching and binding fastening.

**Height-adjustable** stainless steel legs.

Accessories available **on demand**.

## TECHNICAL SPECIFICATIONS

**Width:** 900 mm  
**Depth:** 800 mm  
**Height:** 250 mm  
**Weight:** 42 kg  
**Volume:** 0.47 m<sup>3</sup>  
**Electrical power:** 16.00 kW
